

# E-FUNCTIONAL SKILLS

## FEATURES – ALIGNED TO THE LEARNER JOURNEY

### 9. PRACTICE TESTS

Developed by City & Guilds assessment experts, learners can access a series of practice tests. The practice tests help enable learners to become familiar with the final assessment model and build confidence before the test.

### 8. e-LEARNING CONTENT

Learners can revisit e-learning content to help revise topics and provide a final brush up of knowledge before the final assessment.

### 7. EXAM SCENARIOS

Once learners have secured the knowledge, exam scenarios introduce learners to the types of problem-solving tasks they can expect in their assessment. The scenarios help learners recognise the types of problem-solving tasks they will face and practice answering them effectively.

### 1. LEARNER LOG IN AND CLEAR LEARNER NAVIGATION

Learners receive an individual log in and interact through an intuitive learner landing page which highlights learners 'Latest work' and features navigation tabs to 'Lessons', 'To do List' and 'How am I doing?'

### 6. 'TEST YOUR KNOWLEDGE' TESTS

At the end of each learning module, 'Test your knowledge' tests are available to help learners consolidate their learning and check progress.

### 2. INITIAL ASSESSMENT AND DIAGNOSTIC

Adaptive initial assessment and bite-sized diagnostic tests assess learner's skills level and identify knowledge gaps.

### 3. ILP

Based on the results of the initial assessment and diagnostic tests an individual learning plan (ILP) is generated. The ILP is targeted towards the learners' areas of weakness.

### 4. INDIVIDUAL OR COHORT LESSON BUILDER TOOL

Lesson builder functionality allows tutors to craft tailored lesson plans for cohorts, small groups or individual learners.

### 5. LEARNING MODULES

Full learning modules organised by level and skills area help guide learners through the course. Tutors and learners can access a wealth of engaging and dynamic e-learning content.

## ADDITIONAL FEATURES

### EXPORT CONTENT TO VLE FOR CLASSROOM TEACHING

The system allows tutors to export a SCORM pack of pages or resources which can then be imported into a centres' learning platform

### IMPORT OWN CONTENT

Centres can upload their own resources and useful web links. For example, a centre could choose to upload their own Level 3 content to stretch and prepare a learner for higher levels of attainment. Alternatively, they could upload content from other, relevant qualifications, such as ESOL.

### TUTOR AND LEARNER NOTIFICATIONS

Learners are notified when new resources have been assigned to them by their tutors. Tutors are notified when learners submit work for marking (applicable mainly in English Functional Skills).

### REPORTING AND ANALYTICS

Reporting and analytics tools allow tutors and managers to monitor learner and cohort progress.
